

Appeal

Beloved Brothers and Sisters in Christ,

Three months ago little Paisios was admitted to the hospital with nephrotic syndrome.

Despite the doctors' efforts, the condition of his kidneys has worsened greatly and he is not responding to treatments, which has caused side effects in his body.

At the hospital in Athens no effective therapy has been found so far.

An immediate transfer of Paisios to London is needed, where there is a specialized center that can undertake his treatment.

His family urgently needs financial support to cover the expenses of transportation and hospitalization abroad.

Every help—small or great—can support our little Paisios.
